Investors

PANTERA

An American firm specializing in high-frequency and algorithmic trading.

The company was founded in 1998 and has offices almost all over the world. Two years ago, Tower Research Capital and our company began a collaboration in the algorithms for high-frequency trading area based on our Artificial Intelligence. And now we continue to actively interact in all areas in which we have mutual interests.

FENBUSHI CAPITAL

One of the largest public hedge funds in the world with assets under management is currently about \$175 billion. The hedge fund uses our company's AI and machine learning developments in its work. In particular, our databases have been used to create its own ManGPT, which is now actively used by the public hedge fund to develop trading strategies.

arringtonarrington CAPITAL CAPITAL

Hudson River Trading is an American quantitative trading firm founded in 2002. Uses mathematical methods and algorithms in its business, which have recently been updated and reorganized with the active participation of our company. This trading firm performs algorithmic trading in more than 100 countries around the world.

General partners

An American firm specializing in high-frequency and algorithmic trading. The company was founded in 1998 and has offices almost all over the world. HRT

Hudson River Trading is an American quantitative trading firm founded in 2002. Uses mathematical methods and algorithms in its business, which have recently been updated and reorganized with the active participation of our company. This trading firm performs algorithmic trading in more than 100 countries around the world.

High-Flyer Quant is a Chinese hedge fund founded by Lian Wenfeng. The hedge fund was founded in 2015. In its business, this hedge fund widely applies various AI models, including the development of our company. These are mainly digital products designed to process market data and generate trading signals.

The logo for Renaissance Capital, featuring a stylized "R" icon to the left of the word "Renaissance".

Renaissance

An American hedge fund founded by James Harris Simons in 1978. This fund widely and actively promotes its own quantitative models, which, according to most industry experts, are among the most profitable models in the history of investments. Our company actively implements opportunities for mutual exchange of the latest achievements in the investment models area, using, among other things, our achievements in the digital technologies area.
